Get Back the Younger, Tighter Skin You Used to Have.

## Get Back the Younger, Tighter Skin You Used to Have.

Body by Thermage™ procedures improve skin tone and texture while effectively smoothing, tightening and contouring skin for an overall younger looking appearance.

### ■ See benefits with a single treatment.

Generally, some improvement is immediately visible and continues up to six months.

### ■ There's little to no downtime.

After treatment, you can quickly get back to your normal routine.

### ■ Body by Thermage is colorblind.

Unlike lasers, Body by Thermage procedures work on all skin types and colors.

As you age, the collagen in your skin breaks down, resulting in wrinkles, crepiness and even sagging skin. Body by Thermage procedures tighten and renew your skin's collagen deep down, through all three skin layers: the epidermis, dermis and subcutaneous (fat) layer.

How? Thermage's unique capacitive radio frequency (CRF) technology safely heats the deeper layers of your skin, stimulating existing collagen and promoting new collagen growth. The result: skin that looks and feels noticeably smoother and tighter.

Side effects are generally mild and may include redness, swelling, blisters, bumps and rare instances of surface irregularities. Results vary depending on age and skin condition.

## Get Tighter, Smoother Skin from Head to Toe.
